Dave appearing on 'The Davina Hour' -sharing some sprout related stress advice.

1.0 Introducing Dave Algeo

SPEAKER, AUTHOR, COACH AND 'STRESSED GURU'

Dave helps individuals, companies and organisations (their teams and employees) achieve 'success with wellbeing.' He firmly believes that success at the expense of physical and mental wellbeing is not true, sustainable success.

With over 20 years of policing, leadership and training experience, Dave has gained an exceptional grounding in the realities of emotional and psychological strain and the impact upon our mental health. Over the years Dave has spoken and delivered workshops to a wide variety of audiences. His key message is - sustainable success supporting sustainable wellbeing in individuals, teams and organisations is more than achievable.

Dave has become renowned for using memorable and creative means of getting his message across. He is particularly known for his use of vegetables - cabbages, sprouts and the radish, leading to those he works with retaining powerful strategies and tools to empower them to create and foster sustainable success.

Topics of Interest to Dave

SPEAKER, AUTHOR, COACH AND 'STRESSED GURU'

MALE MENTAL HEALTH

Dave's policing and personal experience have led him to have a particular passion and interest in raising awareness of the issues facing men when it comes to their emotional and psychological wellbeing. He firmly believes that men can find their own way to open up about this aspect of their life and, in so doing, thrive and overcome significant struggles. Dave's hosts a podcast - '**The Man Sprouts Podcast**' and the **Man Sprouts Movement** with the purpose of exploring how we can challenge negative stereotypes surrounding men and mental health.

WORKPLACE WELLBEING

The workplace is a critical environment in which mental, physical and emotional wellbeing can be positively or negatively affected. There is, as indicated in the Stevenson Farmer 'Thriving at Work report on Mental Health and Employers' (Oct 2017), an incredible opportunity to create greater mental wellbeing amongst the UK population by focusing on creating positive, wellbeing focused workplaces. And it is great for business too! Dave runs sessions for employers on creating 'mentally healthy workplaces.'

PERSONAL RESILIENCE AND STRESS

Dave passionately believes that we all have immense capacity to cope with the toughest of situations and experiences. The trouble is, it is HOW we cope, that is often the issue. In other words, we may get through a tough experience, but in order to do so, we may adopt negative coping strategies (resorting to alcohol or drugs). And we may also take care of ourselves less well. Using props, humour and metaphors, Dave provides individuals and teams with the knowledge and tools, to put negative stress in its place, cope more positively and thrive rather than just survive life.

2.0 Services and Content
